INSTALLATION BOXES FOR FIRE ALARM SYSTEMS

POLISH
MANUFACTURER

W2 INSTALLATION BOXES FOR FIRE ALARM SYSTEMS

The PIP type installation boxes produced by us are intended for use in fire alarm systems (FAS). We offer the following versions of boxes: with a fuse (allows the connection of safety devices to the FAS installation, e.g. a sounder), distribution boxes (enable connecting wires and branching lines at an angle of 90°) and junction boxes (enable connecting different types of wires, e.g. with different cross-sections). Inside each box, there are ceramic cubes that ensure the maintenance of electrical functions in fire conditions for a specific period of time (60 or 90 minutes). Some varieties of boxes (PIP-1AN, PIP-3AN) have special rivet nuts on the cover, which enable the alarm device to be mounted directly on the box.

PIP-1AN

ONE HOUSING - 2 VERSIONS

MAIN FEATURES:

Maintaining electrical functions E90

2 current paths with a max. conductor cross-section of 4mm²

Available varieties: with a fuse, e.g. 0,375A and distribution

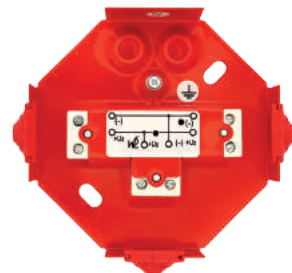

Allows mounting alarm devices on the cover

Allows cable insertion from the base side

Version with fuse is dedicated for: SA-K5, SA-K6, SA-K7, SA-K5N (no synchronization), SA-K7N (no synchronization), SO-Pd13

* PIP-1AN / 0,375A

PIP-1AN / Distribution

PIP-2AN

ONE HOUSING - 3 VERSIONS

MAIN FEATURES:

Maintaining electrical functions E90

The number of current paths and the maximum conductor cross-sections depend on the version

Available varieties: with a fuse, e.g. 0,375A or distribution or junction

The PIP-2AN / 0,375A and PIP-2AN / Distribution / 4mm² boxes allow cables to be inserted from the base side

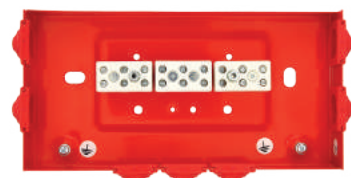

Version with fuse is dedicated for: SA-K5, SA-K6, SA-K7, SA-K5N (no synchronization), SA-K7N (no synchronization), SO-Pd13

PIP-2AN / Distribution / 3 Conductors / 4mm²

PIP-2AN / Junction / 6x4mm²

PIP-2AN / Junction / 9x4mm²

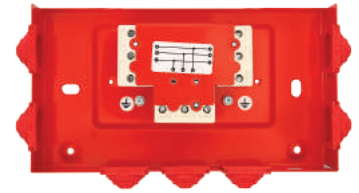

* On request, we are able to produce boxes with a different fuse value.

ONE HOUSING - 2 VERSIONS

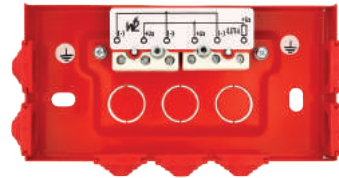

PIP-2AN / Junction / 9x6mm²

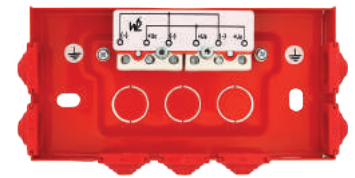

PIP-2AN / Distribution / 3 Conductors / 6mm²

ONE HOUSING - 2 VERSIONS

* PIP-2AN / 0,375A

PIP-2AN / Distribution / 4mm²

PIP-3AN

ONE HOUSING - 2 VERSIONS

MAIN FEATURES:

Maintaining electrical functions E90

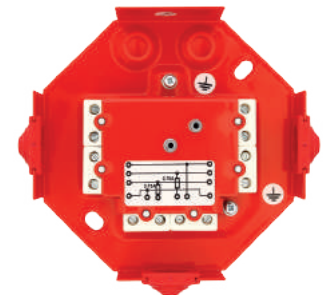

4 current paths with a max. conductor cross-section of 4mm²

Available versions: with a fuse, e.g. 0,75A or distribution

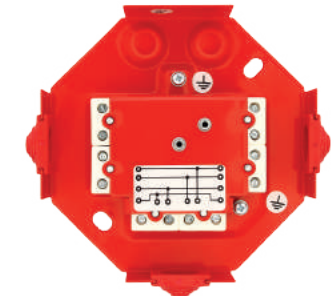

Allows mounting alarm devices on the cover

Allows cable insertion from the base side

Version with fuse is dedicated for: SA-K5N (with synchronization), SA-K7N (with synchronization), SAOZ-Pk2, SG-Pgw3, SGO-Pgw

* PIP-3AN / 0,75A

PIP-3AN / Distribution

PIP-5A

MAIN FEATURES:

Maintaining electrical functions E60, E90

5 current paths with a max. conductor cross-section of 4mm²

Ceramic cubes stacked in two levels

Allows cable insertion from the base side

PIP-5A

PIP-7A

MAIN FEATURES:

Maintaining electrical functions E90

20 current paths with a max. conductor cross-section of 4mm²

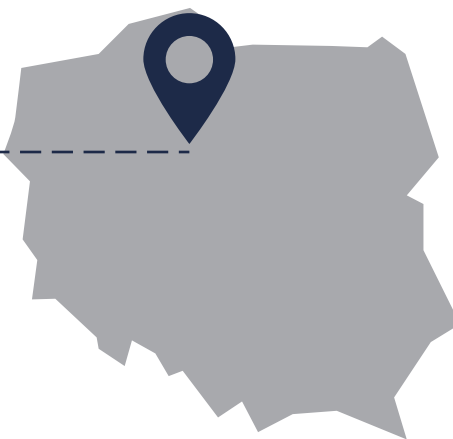

Junction

PIP-7A
