

AUTOMATION MODULE MA-01

Technical data:

Power supply	20..30 V DC
Current consumption at 24V DC	Inactive outputs <5 mA Active outputs <10 mA
Inputs number	6
Outputs number	6
Ingress protection	IP20
Working temperature range	-10°C ÷ +55°C
Max. conductor cross-section	2,5 mm ²
Dimensions	45x75x45 mm
Weight	~90 g

Product description:

- Dedicated for industrial automatic control system, modernisation of old machines and control work of signalling devices SG-Wgw2 and SO-Ad2.
- Control of visual signals generated by the SO-Ad2 signalling device in response to a change of input status is possible.
- Control of messages generated by the SG-Wgw2 (SG-Wgw2 IP65) signalling device in response to a change of input status is possible.
- Six control inputs (volt-free contact).
- Ergonomic enclosure compatible with DIN rail.
